Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-32 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. This new rejection is in view of the Interim Guidelines published on November 2005, incorporated into MPEP 2106 and views presented by the PTO on subject matter eligibility of process claims to the Court of Appeals for the Federal Circuit in *In re Bilski*, Appeal No. 2007-1130. Based on Supreme Court precedent and recent Federal Circuit decisions, a § 101 process must be tied to another statutory class (such as an apparatus) and must positively recite the subject matter that is being transformed by identifying the material that is being changed to a different state.

Therefore claims 1-32 must positively recite the apparatus elements necessary to carry out the method steps and must also positively include the subject matter this is being transformed to a different state or the end result being accomplished. Examiner suggests amending the claims to address the 101 issues.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892 for relevant references of interest.
